

NTP
National Toxicology Program

Summary and Discussion

John E. French, Ph.D.
National Institute of Environmental Health Sciences

NTP Board of Scientific Counselors
December 9-10, 2009

Status & Summary

- 8 research projects in progress at various stages
- 4 projects - in planning and review prior to internal peer review
 - ✓ Multiple strain toxicology and carcinogenesis pre-chronic and chronic studies
 - ✓ Idiosyncratic drug reactions (2 agents)
 - ✓ Creation of mouse LBCL for HSB & BSB (transfection initiated)
 - ✓ Mitochondrial toxicity screening – respiratory capacities and toxins
- Anticipate completions of 2 -3 projects/year and replacement with a similar number of new projects
- Work with NTP study design teams to incorporate new tools
